The 2mm Scale Association. Annual Model Competition 2022

Locomotives - RTR Conversions

The following pages show the entries in the “Locomotives RTR Conversions” category of the 2022 model competition. Voting takes place online, and all members will be emailed voting instructions and a unique voting ID.

To make your choice, look through the pages, and select your choice of best entry, note its number (eg. R3) and select that choice on the online voting form.

Photograph copyright is held by the individual entrants to the competition.

R6. Class 37
A model of EWS Class 37 no. 37 425, modelled when repainted in BR Large Logo livery and named 'Pride of the Valleys/Balchder y Cymoedd' in around 2007 to 2008 when the loco was on general freight duties.

It is renumbered and converted from a Bachmann/Farish 37 using association conversion wheelsets, with added snowploughs on the bogies and the body has been lowered on the chassis to give a more scale gap between body and bogies.

37 425

37 425

R7. LMS 3F “Jinty”.

A model of LMS 3F Tank Engine no. 7509, shedded at Sowerby Bridge during the mid 1930s.

The loco is a conversion of a Bachmann/Graham Farish 3F 'Jinty' loco, using the association conversion parts. The chimney has been replaced with a more accurate N Brass cast chimney and it has been repainted, renumbered, detailed and weathered to mid 1930s condition.

R8. BRCW Type 2 (Class 26)

This is a Dapol BRCW Type 2 (Class 26) converted to 2mmFS using the article published in the magazine back around Christmas '21 - using the original axles, knocking off the N gauge wheels and replacing them with a set of 2mmFS wheels.
I've weathered it with a mix of acrylic and oil paints both by brush and airbrush.

R25. Class 66

Graham Farish Class 66 in DB Schenker livery as 66101. Converted with 2mm association drop in wheelsets. Full detail on one end, weathered with a mix of acrylics through the airbrush and oil paints.

DB SCHENKER
66101

R26. Class 20

Graham Farish Class 20 in Railfreight livery as 20156. Converted with 2mm association drop in wheelsets. Full detail on one end, weathered with a mix of acrylics through the airbrush
